TELEPASS AND ENEL X: TOGETHER FOR EVER GREENER MOBILITY

- *The Telepass Pay app is now available for recharging electric vehicles at Enel X recharging stations throughout the country*

Rome, August 5th, 2021 — Telepass, the Italian leader in integrated mobility, and Enel X, the Enel Group's global business line offering services to accelerate innovation and drive energy transition, announce their partnership for smart and sustainable mobility: Enel X's stations for recharging electric vehicles have been integrated into the Telepass Pay app.

The partnership with Enel X allows Telepass to further strengthen its position as an enabler of integrated, flexible, safe and sustainable mobility. The objective of Telepass, summarized in the Safe&Clean philosophy adopted by the company, is to offer its customers a more complete ecosystem since it is cashless, and an increasingly green perspective. To use the service, download the Telepass Pay app, select the Enel X recharging service and, using the map, locate the nearest available recharging point out of the more than 13,000 installed by the company throughout Italy.

"The agreement we signed with Telepass is a clear example of how e-mobility is increasingly central to the business strategies of companies dealing with integrated mobility solutions," said **Augusto Raggi**, Head of Enel X Italia. *"Starting today, it will be even easier and faster for all Telepass customers to find Enel X recharging points, as they can count on a widespread network covering the whole country, which is fully visible on the Telepass app. This added-value service is part of the business strategy pursued by Enel X, which is committed to dialogue with major industry partners and to developing the recharging technologies needed to accelerate the transition to sustainable mobility."*

"With the integration of Enel X's charging stations into our integrated mobility ecosystem, we are adding a new element to our commitment to ever greener mobility," commented **Gabriele Benedetto**, CEO of Telepass. *"Electric mobility is increasingly present in our daily lives, especially in urban centers, and Telepass' objective is to contribute to the expansion of green modes of travel. With this in mind, on Telepass Pay it is already possible, for example, to rent scooters, bicycles and electric scooters to get around the city while respecting the environment, or to book a car wash at home provided by the eco-sustainable car washing startup Wash Out, part of the Telepass Group."*

Enel X is Enel Group's global business line offering services that accelerate innovation and drive the energy transition. A global leader in the advanced energy solution sector, Enel X manages services such as demand response for around 7.4 GW of total capacity at global level and 137 MW of storage capacity installed worldwide, as well as 232,000 electric vehicle charging points made available around the globe¹. Through its advanced solutions, including energy management, financial services and electric mobility, Enel X provides each partner with an intuitive, personalized ecosystem of tech platforms and consulting services, focusing on sustainability and circular economy principles in order to provide people, communities, institutions and companies with an alternative model that respects the environment and integrates technological innovation into daily life. Each solution has the power to turn

decarbonization, electrification and digitalization goals into sustainable actions for everyone, in order to build a more sustainable and efficient world together.

¹Public and private charging points. It includes interoperability points.

Telepass

The Telepass Group was founded in 2017 with the aim of creating an integrated system of services for urban and extra-urban mobility. Today Telepass is an ecosystem that offers private individuals and companies an ever-increasing number of options, which can also be used digitally, for flexible, safe and sustainable mobility. A mobility pioneer committed to facilitating people's freedom of movement by expanding its offering, investing in cutting-edge start-ups and ensuring access to its services across Europe, so that every journey is a truly borderless experience. <https://www.telepass.com>
