RELEASE

ENEL X AND SCIUKER FRAMES TEAM UP FOR ENEL X'S "VIVI MEGLIO UNIFAMILIARE" SUPERBONUS 110% OFFER

Rome, March 16th, 2021 – Sciuker Frames S.p.A., a group operating in the green economy and new circular economy systems for smart cities, has signed an agreement with Enel X through Sciuker Frames, a company active in the production of Made in Italy eco-friendly windows. Enel X is a business line of the Enel Group that designs and develops solutions based on the principles of sustainability and the circular economy, to provide people, communities, institutions and companies with an alternative model for living in cities and integrating technological innovation into everyday life. The agreement is for the supply and installation of windows and doors as part of Enel X's "Vivi Meglio Unifamiliare" offer.

The offer covers technological work (heat pumps, photovoltaics, electric charging stations, etc.) and windows, for owners of detached or semi-detached houses who want to make their homes more efficient by leveraging on the legislation set out in Italy's "Decreto Rilancio" (the so-called "Superbonus 110%"). Customers will not have to pay for the work in advance thanks to the tax credit transfer, and with Enel X, there will be no extra costs for the initial inspection and preparation of the Energy Performance Certificate (APE, from the Italian Attestato di Prestazione Energetica).

Enel X sells the "Vivi Meglio Unifamiliare" offer and acts as the General Contractor. By adopting a standardized approach, it is possible to complete the technology and fixtures work in an average of just seven days after the goods are received by the contractors working on the site.

Just two weeks after the start of the collaboration with Enel X, Sciuker Frames has already received more than 50 orders for a total amount of over 1.5 million euros.

*"We are very proud to be part of this project to renovate Italy's detached housing stock alongside an international partner like Enel X," says **Marco Cipriano**, CEO of Sciuker Frames. "The project's business model means that it is possible to make a double energy class jump in detached houses, by replacing windows and heating systems at an unprecedented speed. The collaboration with Enel X is another step in the Sciuker Frames Group's commitment to building the detached homes of tomorrow."*

*"Our Country System can restart on a social and economic level thanks to the Relaunch Decree and the 110% Superbonus. Enel X wants to play an active role in the recovery and also support Italian businesses," says **Andrea Scognamiglio**, Head of Global e-Home at Enel X. "The agreement signed with Sciuker Frames is a concrete example of our commitment to making sustainability accessible to everyone, while enhancing the value of Made in Italy."*

Enel X is the global business line of the Enel Group that provides services to accelerate innovation and drive the energy transition. A world leader in advanced energy solutions, Enel X operates demand response services, with approximately 6 GW of total capacity and 124 MW of installed storage capacity worldwide, as well as approximately 175,000 public and private charging points for electric vehicles globally¹. Offering advanced solutions, including energy management, financial services and e-mobility, Enel X provides each partner with a customized ecosystem of technology platforms and consulting services, based on the principles of sustainability and the circular economy. The aim is to provide people, communities, institutions and companies with an alternative model, which respects the environment and integrates technological innovation into everyday life. Each solution is designed to turn the goals of decarbonization, electrification and digitalization into sustainable actions for everyone, in order to build a more sustainable and efficient world together.

About Sciuker Frames

Sciuker Frames S.p.A. is a group that operates in the green economy, with the mission of increasing energy efficiency and home comfort. The Group has the well-being and quality of life in the homes of Italians at heart every day, and is committed to creating new parts of sustainable cities by installing high-performance energy windows and carrying out building renovation work all over Italy. For a quarter of a century, Sciuker Frames has specialized in the design and production of eco-friendly windows with Made in Italy design that safeguard the planet, in full compliance with the principles of the circular economy. Sciuker Frames has created a revolutionary window system based on its patented and proprietary Stratec technology, thanks to which the company creates tailor-made products that combine comfort, aesthetics and energy efficiency. Sciuker Frames now has a nationwide presence with over 300 dealers and five directly operated stores. Sciuker Ecospace srl carries out energy requalification work on condominiums and housing units, using all the fiscal and environmental advantages set out in the Decreto Rilancio's Ecobonus 110%, with the aim of building new sustainable cities and reducing CO₂ emissions before we reach the point of no return. Continuous research into innovation for the optimal energy efficiency of windows and the use of certified materials allow the Sciuker Frames Group to pursue the sustainability ideals that have always driven it. The Group's green commitment also extends to its modern, environmentally friendly production plant in Avellino, which has a production capacity of around 35,000 windows per year.
