## Dow Corning Deploys EnerNOC's Energy Intelligence Software Platform

BOSTON, Feb. 12, 2015 (GLOBE NEWSWIRE) -- [EnerNOC, Inc.](http://www.enernoc.com) (Nasdaq:ENOC), a leading provider of energy intelligence software (EIS), today announced that Dow Corning, a global leader in silicones, silicon-based technology, and innovation, has deployed EnerNOC's utility bill management solution across more than 30 sites in 10 countries. This deployment of EnerNOC's software will enable Dow Corning to improve its management of all utility bills each year in different currencies and under unique rate structures, and will help the company gain greater visibility into its energy costs at the commodity, facility, country, and global levels.

"An enterprise energy management solution like EnerNOC's helps us standardize and centralize our utility bill management and energy data analysis across our global operations, and provides the robust analytics we need to benchmark against and report on company goals," said Rod Williamson, Global Energy Category Manager at Dow Corning. "This investment aligns with Dow Corning's commitment to best practices in operational efficiency, sustainability, and continuous improvement."

With EnerNOC's processes and software, Dow Corning will be able to take a more proactive approach to energy management, tracking spend against budget within a given billing period versus waiting until bills arrive. Dow Corning will also have the ability to benchmark its portfolio of sites against each other to easily identify outliers, prioritize opportunities for efficiency based on relative building performance, and create transparency between procurement, accounts payable, sustainability, and other discrete departments.

"Multinational companies like Dow Corning that deploy energy intelligence software understand the benefits of gaining centralized visibility into energy use and costs," said Tim Healy, Chairman and CEO of EnerNOC. "When enterprises can aggregate and analyze energy data in a way that provides actionable insights, energy management becomes much more straightforward, and can be a source for productivity gains, operational efficiencies, better forecasting and planning, and improved cost control."

### About EnerNOC

EnerNOC is a leading provider of cloud-based energy intelligence software (EIS) and services to thousands of enterprise customers and utilities globally. EnerNOC's EIS solutions for enterprise customers improve energy productivity by optimizing how they buy, how much they use, and when they use energy. EIS for enterprise includes budgeting and procurement, utility bill management, facility optimization, visibility and reporting, project tracking, demand management, and demand response. EnerNOC's EIS solutions for utilities help maximize customer engagement and the value of demand-side resources, including demand response and energy efficiency. EnerNOC supports customer success with its world-class professional services team and a Network Operations Center (NOC) staffed 24x7x365.
