EnerNOC Unveils New Platform Capabilities at EnergySMART Global Conference

Updated User Experience and New Procurement Platform Make Energy Intelligence Simpler, More Personal

BOSTON and PHILADELPHIA, March 25, 2015 (GLOBE NEWSWIRE) -- [EnerNOC, Inc.](#) (Nasdaq:ENOC), a leading provider of energy intelligence software (EIS), previewed the future of energy management today at its global EnergySMART Conference, which brings together over 1,000 people from dozens of industries, eight countries, and more than 40 states, representing over \$40 billion in annual energy spend. At the event, EnerNOC announced the release of a new user interface, making energy management more personal and actionable, as well as new procurement capabilities that identify and prioritize buying opportunities, empowering users to make more informed, proactive procurement decisions.

"The capabilities we've debuted at this year's EnergySMART Conference are designed to make energy expense management simpler and more intuitive," said Micah Remley, Senior Vice President of Product at EnerNOC. "Customer success is so important to us, and these new tools are perfectly aligned with our commitment to transform energy management with powerful software solutions that allow our customers to do their jobs better."

EnerNOC's new user experience prioritizes the most important and relevant information for each user, and translates energy usage data into more meaningful financial terms that anyone in an enterprise can understand. The new capabilities allow users to share opportunities and assign them to stakeholders across the organization in a single click. This new interface is also available on any device. EnerNOC's new procurement capabilities allow users to map contract expirations and anticipate favorable market conditions for procuring gas and electricity for their operations.

"The explosion of choice is driving a once-in-a-generation transformation and prompting questions such as: 'Who do I get my energy from?' 'Do I want to invest in solar?' 'Where should I focus efforts with my limited budget?' With all of these choices comes tremendous complexity. With EnerNOC's software, that complexity is removed and opportunities are prioritized," said Tim Healy, Chairman and CEO of EnerNOC. "It's very exciting to reveal this new functionality to over 1,000 current and prospective users in one place. The positive reception has been overwhelming and shows that we continue to be on the right track."

In addition to the new capabilities highlighted today, conference sessions covered topics such as deconstructing a utility bill, how to implement a strategic energy management program, energy management best practices in verticals including commercial real estate and manufacturing, and more.
