EnerNOC and Tesla to Collaborate on Energy Storage

BOSTON, May 1, 2015 (GLOBE NEWSWIRE) -- [EnerNOC, Inc.](#) (Nasdaq:ENOC), a leading provider of energy intelligence software (EIS), today announced that it will collaborate with [Tesla](#) on the deployment and management of energy storage systems in commercial and industrial buildings. EnerNOC and Tesla will enable enterprises to monetize the batteries through demand charge management and demand response using EnerNOC's EIS. Initial collaboration will include select EnerNOC customers in California.

"By working together, EnerNOC and Tesla can help enterprises find new, innovative ways to save money and get paid for their operational flexibility," said Tim Healy, Chairman and CEO of EnerNOC. "Energy storage has great potential and is a natural fit with energy intelligence software. We are excited to explore the possibilities with Tesla."

Enablement of EnerNOC customer sites with Tesla energy storage systems is currently underway.

"Energy management today is more complicated than simply buying power from the utility. Innovative companies like Tesla give us new options that enable us to reduce our reliance on the grid when prices are high, and EnerNOC's software gives us the visibility we need to make informed decisions about when to use these technologies and how to measure the impact they're having on our business," said Scott Limbacher, Vice President of Construction and Maintenance at Stater Bros. Markets, a Southern California supermarket chain.

About EnerNOC

EnerNOC is a leading provider of cloud-based energy intelligence software (EIS) and services to thousands of enterprise customers and utilities globally. EnerNOC's EIS solutions for enterprise customers improve energy productivity by optimizing how they buy, how much they use, and when they use energy. EIS for enterprise includes budgeting and procurement, utility bill management, facility optimization, visibility and reporting, project tracking, demand management, and demand response. EnerNOC's EIS solutions for utilities help maximize customer engagement and the value of demand-side resources, including demand response and energy efficiency. EnerNOC supports customer success with its world-class professional services team and a Network Operations Center (NOC) staffed 24x7x365. For more information, visit www.enernoc.com.

Safe Harbor Statement

Statements in this press release regarding management's future expectations, beliefs, intentions, goals, strategies, plans or prospects, including, without limitation, statements relating to the future growth and success of the Company's energy intelligence software, and the benefits that customers may derive from technology updates or enhancements to that software, may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. Forward-looking statements can be identified by terminology such as "anticipate," "believe," "could," "could increase the likelihood," "estimate," "expect," "intend," "is planned," "may," "should," "will," "will enable," "would be expected," "look forward," "may provide," "would" or similar terms, variations of such terms or the negative of those terms. Such forward-looking statements involve known and unknown risks, uncertainties and other factors including those risks, uncertainties and factors referred to under the section "Risk Factors" in EnerNOC's most recent Annual Report on Form 10-K and subsequent Quarterly Reports on Form 10-Q, as well as other documents that may be filed by EnerNOC from time to time with the Securities and Exchange Commission. As a result of such risks, uncertainties and factors, the Company's actual results may differ materially from any future results, performance or achievements discussed in or implied by the forward-looking statements contained herein. EnerNOC is providing the information in this press release as of this date and assumes no obligations to update the information included in this press release or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
