Walgreens Standardizes on EnerNOC's Energy Intelligence Software Platform

Retailer Uses EnerNOC EIS for Energy Expense Management

BOSTON, Aug. 25, 2015 (GLOBE NEWSWIRE) -- [EnerNOC, Inc.](#) (Nasdaq:ENOC), a leading provider of energy intelligence software (EIS), announced today that during the first quarter, Walgreens expanded its use of EnerNOC's energy intelligence software to manage its utility bills at more than 8,300 sites across the United States.

"Managing energy expenses from over 30,000 discrete utility accounts can be a daunting task, but EnerNOC's energy intelligence software centralizes that data, giving us a clear line of sight into exactly how much we're spending and where. It also automatically analyzes the data for key trends and ensures that we're billed correctly," said Monica Ferrer, Senior Manager of Energy and Utilities at Walgreens. "We are excited to standardize on the EnerNOC platform and increase control over our energy costs, which are a significant component of our overall operating expenses."

This expanded rollout of EnerNOC's EIS to manage Walgreens' utility bills replaces an incumbent solution. EnerNOC is able to provide global support, conduct robust auditing, and automate analyses. EnerNOC software will give Walgreens the visibility necessary to create more accurate energy budgets, track performance, and identify top priorities for improvement.

"Companies like Walgreens gain a competitive advantage when they deploy energy intelligence software to improve corporate governance," said Eric Erston, Vice President of Global Sales at EnerNOC. "EnerNOC's EIS is an ideal energy decision support system for enterprises to manage energy costs with the same discipline that they manage other major operating expense categories."
