## Allergan Standardizes Energy Management With EnerNOC's Energy Intelligence Software

BOSTON, Feb. 24, 2016 (GLOBE NEWSWIRE) -- [EnerNOC, Inc.](#) (Nasdaq:ENOC), a leading provider of energy intelligence software (EIS), announced today that Allergan, a diversified global pharmaceutical company, has purchased EnerNOC's EIS to centralize its energy management and sustainability reporting across its portfolio of manufacturing, R&D, and office sites.

"After significant M&A activity, we wanted to enhance our energy management strategy with the goals of increasing visibility, optimizing energy procurement, and identifying missed opportunities at the top of our priority list," said Thomas Pagliuco, Director of Global Energy Engineering at Allergan. "EnerNOC's EIS will allow us to navigate the additional complexities of purchasing energy and managing our energy expenses across our expanded global footprint, and help ensure we stay on track to meet our corporate efficiency and sustainability goals."

With EnerNOC's software, Allergan will standardize energy management across its entire portfolio, allowing for improved budgeting, forecasting, and energy expense management. Sustainability reporting and efficiency projects will be visible in one platform, enabling Allergan employees to track, prioritize, and assess the progress of energy management initiatives. Allergan will utilize EnerNOC's online auction platform to meet its renewable procurement targets and achieve the best possible price in all of its energy transactions.

"Global pharmaceutical companies like Allergan have complicated energy requirements and processes that must meet stringent regulatory standards in addition to corporate goals around budgeting, sustainability, and productivity," said Eric Erston, Vice President of Global Sales at EnerNOC. "With EnerNOC's EIS, companies can address compliance obligations while also achieving profitability and sustainability objectives."
