EnerNOC Wins 2016 ENERGY STAR® Partner of the Year Award

BOSTON, March 28, 2016 (GLOBE NEWSWIRE) -- [EnerNOC, Inc.](#) (Nasdaq:ENOC), a leading provider of energy intelligence software (EIS) and demand response solutions, today announced that it has been recognized by the U.S. Environmental Protection Agency (EPA) with a 2016 ENERGY STAR Partner of the Year — Service and Product Provider Award for its outstanding success in helping businesses drive profitability, improve sustainability, and achieve new levels of visibility with its energy intelligence software.

"ENERGY STAR is a valuable business intelligence metric that enables our customers to better understand how they stack up against their peers, track improvements over time, and communicate their energy management efforts internally and externally," said Micah Remley, Senior Vice President of Product at EnerNOC. "Whether companies benchmark their facilities voluntarily or to comply with municipal or state mandates, EnerNOC's software is designed to make ENERGY STAR reporting more straightforward by centralizing high quality energy data in a single platform. As a result, our customers spend fewer resources collecting data and more time on initiatives that improve ENERGY STAR scores and reduce overall operating costs."

EnerNOC's EIS was recognized for launching new ENERGY STAR Portfolio Manager data management capabilities that automate ENERGY STAR reporting. Since 2015, EnerNOC has helped to benchmark nearly 7,500 buildings in Portfolio Manager.

"EnerNOC is helping businesses and organizations save money, save energy, and do their part to reduce our nation's greenhouse gas emissions that contribute to climate change," said EPA Administrator Gina McCarthy. "Through its focus on energy efficiency, EnerNOC demonstrates a desire to preserve a healthy planet for future generations by inspiring others to join the cause."

ENERGY STAR has 16,000 partners working to protect the environment through greater energy efficiency, including manufacturers, retailers, public schools, hospitals, real estate companies, and home builders.

About EnerNOC

EnerNOC is a leading provider of energy intelligence software (EIS) and demand response solutions. With capabilities to better address budgets and procurement, utility bill management, facility analysis and optimization, sustainability and reporting, project tracking, and demand management, EnerNOC's enterprise SaaS platform helps businesses control energy costs, mitigate risk, and streamline compliance and sustainability reporting. EnerNOC also offers access to more demand response programs worldwide than any other provider, offering businesses a valuable payment stream to further enhance bottom line results. EnerNOC's utility SaaS platform enables energy suppliers to forge deeper customer relationships, address regulatory mandates, and cost-effectively integrate demand-side resources to improve grid reliability through key capabilities, including customer engagement, demand response, energy efficiency, operational effectiveness, and wholesale procurement. About ENERGY STAR

ENERGY STAR® is the simple choice for energy efficiency. For more than 20 years, people across America have looked to EPA's ENERGY STAR program for guidance on how to save energy, save money, and protect the environment. Behind each blue label is a product, building, or home that is independently certified to use less energy and cause fewer of the emissions that contribute to climate change. Today, ENERGY STAR is the most widely recognized symbol for energy efficiency in the world, helping families and businesses save \$362 billion on utility bills, while reducing greenhouse gas emissions by more than 2.4 billion metric tons since 1992. Join the millions who are already making a difference at energystar.gov.

Safe Harbor Statement

Statements in this press release regarding management's future expectations, beliefs, intentions, goals, strategies, plans or prospects, including, without limitation, statements relating to the future growth and success of the Company's energy

intelligence software, and the benefits that customers may derive from technology updates or enhancements to that software, may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 and other federal securities laws. Forward-looking statements can be identified by terminology such as "anticipate," "believe," "could," "could increase the likelihood," "estimate," "expect," "intend," "is planned," "may," "should," "will," "will enable," "would be expected," "look forward," "may provide," "would" or similar terms, variations of such terms or the negative of those terms. Such forward-looking statements involve known and unknown risks, uncertainties and other factors including those risks, uncertainties and factors referred to under the section "Risk Factors" in EnerNOC's most recent Annual Report on Form 10-K and subsequent Quarterly Reports on Form 10-Q, as well as other documents that may be filed by EnerNOC from time to time with the Securities and Exchange Commission. As a result of such risks, uncertainties and factors, the Company's actual results may differ materially from any future results, performance or achievements discussed in or implied by the forward-looking statements contained herein. EnerNOC is providing the information in this press release as of this date and assumes no obligations to update the information included in this press release or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
