

EnerNOC Utility Bill Management

Product Specifications Sheet

EnerNOC’s utility bill management (“UBM”) solutions give your enterprise insight into your utility bill data so you know exactly what you are spending on energy across your business. Our UBM solutions streamline the bill collection, validation, and payment process, providing you with transparency and visibility into your utility bill data so you can more accurately manage budgets and report on

value-added corporate initiatives. Centralizing utility bill data from over 100 countries, our UBM online platform serves as a single source of truth for your enterprise, providing a comprehensive summary of site, account, and historical billing information for every facility, globally and whenever you need it. Below you will find a feature-by-feature breakdown of our UBM solutions.

Add-On Features ⁵	Customized Accounts Payable (AP) Files ²
	Meter Module and Usage Summary Report
	Period Accruals Analysis and Report
	Link to Existing EnergySTAR Accounts ⁴

The foregoing reflects the current features of our UBM solutions, which features may change from time to time.

1 Customer will submit its utility bills to EnerNOC after payment, or, for “pre-pay” accounts only, EnerNOC will collect Customer’s utility bills directly from suppliers.

2 Available only for “pre-pay” accounts.

3 For each account receiving the UBM solutions, EnerNOC will (a) process and validate Customer data from Customer’s latest available bill and set up Customer for the provision of the UBM solutions; and (b) process Customer data from the twelve (12) month period preceding the Order Effective Date on Customer’s Order Form.

4 Available only for accounts in the United States.

5 Each add-on feature is sold separately from the UBM solutions, and is provided only if purchased by Customer at an additional cost, as indicated on Customer’s Order Form.
