

PJM DR Program Options

How to make the most of your participation in the PJM Market

The Benefits of Multi-Program Enrollment

Demand Response (DR) helps keep the lights on! Different programs address electric grid constraints at various levels. Your participation in multiple programs helps support all types of grid emergencies, whether they are local or grid-wide.

You are compensated separately for each program that your site participates in. By enrolling the same site in multiple DR programs, you are increasing the revenue potential for that site.

Programs at a Glance

	Emergency Load Response Program (ELRP)	Act 129	Sync Reserve Market (SRM)
Dispatcher	PJM Interconnection	Your Local PA Utility	PJM Interconnection
Trigger	System-wide grid risks from peak demand or transmission constraints	Electric grid day-ahead forecasted season peak	Unforeseen transmission and generation outages
Lead Time	30 minutes (60 or 120 minutes by exception only)	24+ hours	10 minutes
Baseline	Flat baseline determined by your average Peak Load Contribution (PLC) during the previous year	Varying baseline determined by your peak consumption in the last 5 business days	Determined by real time demand at the start of the dispatch
Dispatch Likelihood	Low (Historic average of 0-1 dispatches/year, each lasting 1-2 hours)	Medium (Historic average of 4 dispatches/season, each lasting 4 hours)	High (Historic average of 1 dispatch/month, lasting <10 minutes)

Maximize Your Revenue Potential

Keys to Success

1. Expect to be audited for ELRP for at least one hour per year.
2. Utility programs generally dispatch more frequently. If Act 129 dispatches more hours than you can participate in comfortably, consider prioritizing curtailment hours towards PJM ELRP over utility triggered dispatches.
3. In the event that two programs are dispatched simultaneously, drop to the lower of your two targets to maximize earning potential.
4. For more information on program mechanics, visit our [Demand Response Participation Guide](#).

Potential Revenue Breakdown

Please note that these are estimated values based on market conditions and assume 100% performance in all programs.

Check your notification subject line to confirm which program is being dispatched!
