

ENEL X ROMANIA LAUNCHES EV CHARGING POINTS NETWORK IN BUCHAREST AND SURROUNDING AREAS

- Drivers will be able to recharge their vehicles at the Enel X charging points using the [JuicePass](#) mobile app

Bucharest, August 11th, 2020 – Enel X Romania, a subsidiary of the Enel Group's advanced energy services business line, Enel X, has installed and put in operation a network of 34 charging points in Bucharest and surrounding areas, as part of its plan to build a wide charging infrastructure for electric vehicles across Romania.

"The sales of electric and hybrid vehicles is constantly increasing, even during the difficult period that we are facing, and in a context that sees the auto market massively decreasing overall. However, we are confident that the electric segment will maintain its ascending course, in Romania in particular also due to the relaunch of Rabla Plus governmental program, which has proved to be of real value for the customers. We are very happy to allow users of EVs in Romania more flexibility for their mobility needs, and help improve access to charging infrastructure for more adopters of electric mobility, following our pledge to enable transportation anywhere in the country in a cleaner and more sustainable way", said **Marius Chiriac**, Head of Enel X Romania.

The charging infrastructure installed is based on the new, intelligent charging solutions of the Enel X global business line. The majority of the first series of charging points are 2x22 kW units, named JuicePole, which allow for the recharge of two electric vehicles simultaneously and for the charge of up to 40% of the battery levels in 30 minutes, depending on the car model and specifications. The Enel X installed charging solutions account also for the fast charging JuicePump, which is 50 kW DC, 22 or 43 kW AC, and allows the recharge of two electric vehicles at the same time.

Users will be able to recharge their vehicles at the Enel X charging points using the [JuicePass](#) mobile app - the single interface for Enel X customers to access a network of over 50,000 public charging points across 18 European countries, leveraging on the interoperability partnership with charging network operators IONITY and SMATRICES. The app can be downloaded from [Google Play](#) or [App Store](#), and an installing guide can be accessed on [enelx.ro](#) website.

Drivers can check the locations and status of Enel X charging points on an interactive map either on JuicePass app, or on the website, [here](#). They can see in real time if a charging station is available, occupied or in maintenance, as well as its type (fast, ultra fast), the charging cable type, power, accessibility and distance to reach it.

Enel X Romania has the largest public e-Mobility infrastructure plan in the country, which includes the installation of approx. 2,500 charging points across all of the country's regions up to 2023, involving an overall investment of approximately 15 up to 20 million euros.

The installation of Enel X charging points will continue with other units in Bucharest, Timișoara, Sibiu and Constanța. The plan covers all of Romania's regions, and is aimed at adapting the distribution and installation of charging stations to the development of EV use in the country, at household and institutional level, as well as among businesses, through the demand from fleet owners.

Enel X Romania installs charging infrastructure on the premises of "Recharge Partners" - shopping malls, supermarkets, restaurants and hotels that want to attract electric car users. The installation and maintenance of the charging infrastructure comes at no cost to the company's Recharge Partners in exchange for the availability of parking areas.

The company is also offering a similar service to municipalities that are interested in improving air quality by encouraging electric mobility. Enel X Romania helps local authorities identify the most appropriate solutions and provides the installation and maintenance of the charging infrastructure at no cost, on public parking spaces.

Enel X Romania also ensures call center services, in order to assist drivers who charge their vehicles to its charging points, and who can call for assistance at 031.4032.231, from Monday to Sunday, between 08:00 – 24:00.

Starting this summer, a tariff model has been applied, according to which drivers can charge their electric vehicles starting from 1.29 lei/recharging unit (1 recharging unit = 1 kWh). More details about the tariff plan [here](#).

Enel is a multinational power company and a leading integrated player in the global power, gas and renewables markets. It is the largest European utility by ordinary EBITDA, and is present in over 30 countries worldwide, producing energy with over 86 GW of installed capacity. Enel distributes electricity through a network of over 2.2 million kilometers, and with 74 million business and household end users globally, the Group has the largest customer base among its European peers. Enel's renewables arm Enel Green Power is the world's largest renewable private player, with around 46.4 GW of wind, solar, geothermal and hydropower plants installed in Europe, the Americas, Africa, Asia and Oceania.

Enel X is Enel's global business line dedicated to the development of innovative products and digital solutions in sectors where energy is showing the greatest potential for transformation: cities, homes, industries and electric mobility. The company is a global leader in the advanced energy solution sector, managing services such as demand response for more than 6 GW of total capacity at global level and 110 MW of storage capacity installed worldwide, as well as a leading player in the electric mobility sector, with around 130,000 public and private EV charging points made available around the globe.

Enel Romania is a leading private investor in energy, with operations in power distribution and supply as well as renewable energy production, active on the local market since 2005. The company has 3,100 employees and around 3 million business and household end users in the country. The E-Distributie companies operate a network of around 128,000 kilometres in three key areas of the country: Muntenia Sud (including Bucharest), Banat and Dobrogea, accounting for one third of Romania's electricity distribution market, and are developing an investment programme aimed at securing a proper service for customers, improving the quality and security of the network while also complying with Enel's environmental standards. Enel Energie and Enel Energie Muntenia are leading suppliers of energy in the country, and their offer includes electricity and natural gas, as well as value-added services (assistance, lighting and others).
