ENEL X ROMANIA INSTALLED TWO NEW ELECTRIC VEHICLE CHARGING STATIONS IN TIMIȘOARA

Bucharest, September 16, 2020 - Enel X Romania, part of Enel X, the advanced energy services division of Enel Group, has put into operation two new charging stations for electric vehicles, one in Dumbrăvița, near Timișoara, and one in Banat's capital, on 16 Decembrie 1989 Boulevard. Thus, the charging points network developed by the company in Romania has reached 38 units, most of which are currently located in Bucharest.

"Electric vehicles are the most dynamic segment of new vehicle sales in Romania, stimulated by the government program Rabla Plus as well, whose funds have been recently supplemented. We want to support the Romanians who are stepping up the transition to electric mobility by installing an increasing number of charging stations for electric vehicles in Romania. We thus contribute to improving access to electric charging infrastructure, in line with our commitment to facilitate transportation anywhere in the country, in a cleaner and more sustainable way", said Mihai Mardale, Head of e-Mobility Enel X Romania.

The most recent charging stations launched by Enel X are of the [JuicePole](#) type and there is one near Timișoara, on Conac street in Dumbrăvița, on an intensely circulated artery, and the second one on 17, 16 Decembrie 1989 Boulevard. With a power of 2 x 22 kW each, the two stations allow the recharging of two electric vehicles simultaneously and the charging of up to 40% of the battery level in 30 minutes, depending on the car model and specifications.

The two recently installed charging stations increase the number of Enel X stations in Timiș County to three, the first of them, a [JuicePump](#) type, being located inside the Timișoara airport premises.

Users will be able to recharge their vehicles at the Enel X charging points using the [JuicePass](#) mobile app - the single interface for Enel X customers to access a network of over 50,000 public charging points across 18 European countries, leveraging on the interoperability partnership with charging network operators IONITY and SMATRICS. The app can be downloaded from [Google Play](#) or [App Store](#), and an installing guide can be accessed on [enelx.ro](#) website.

Drivers can check the locations and status of Enel X charging points on an interactive map either on JuicePass app, or on the website, [here](#).

Enel X Romania has the largest public e-Mobility infrastructure plan in the country, which includes the installation of approx. 2,500 charging points across all of the country's regions up to 2023, involving an overall investment of approximately 15 up to 20 million euros.

The installation of Enel X charging points will continue with other units in Bucharest, Timișoara, Sibiu and Constanța and is aimed at adapting to the development of EV use in the country, at household and institutional level, as well as among businesses, through the demand from fleet owners.

Enel X Romania installs charging infrastructure on the premises of “Recharge Partners” - shopping malls, supermarkets, restaurants and hotels that want to attract electric car users. The installation and maintenance of the charging infrastructure comes at no cost to the company’s Recharge Partners in exchange for the availability of parking areas.

The company is also offering a similar service to municipalities that are interested in improving air quality by encouraging electric mobility. Enel X Romania helps local authorities identify the most appropriate solutions and provides the installation and maintenance of the charging infrastructure at no cost, on public parking spaces.

Enel X Romania also ensures call center services, in order to assist drivers who charge their vehicles to its charging points, and who can call for assistance at 031.4032.231, from Monday to Sunday, between 08:00 – 24:00.

The company applies a tariff model based on which drivers can charge their electric vehicles starting from 1.29 lei/recharging unit (1 recharging unit = 1 kWh). More details about the tariff plan [here](#).

Enel is a multinational power company and a leading integrated player in the global power, gas and renewables markets. It is the largest European utility by ordinary EBITDA, and is present in over 30 countries worldwide, producing energy with over 86 GW of installed capacity. Enel distributes electricity through a network of over 2.2 million kilometers, and with 74 million business and household end users globally, the Group has the largest customer base among its European peers. Enel’s renewables arm Enel Green Power is the world’s largest renewable private player, with around 46.4 GW of wind, solar, geothermal and hydropower plants installed in Europe, the Americas, Africa, Asia and Oceania.

Enel X is Enel's global business line dedicated to the development of innovative products and digital solutions in sectors where energy is showing the greatest potential for transformation: cities, homes, industries and electric mobility. The company is a global leader in the advanced energy solution sector, managing services such as demand response for more than 6 GW of total capacity at global level and 110 MW of storage capacity installed worldwide, as well as a leading player in the electric mobility sector, with around 130,000 public and private EV charging points made available around the globe.

Enel Romania is a leading private investor in energy, with operations in power distribution and supply as well as renewable energy production, active on the local market since 2005. The company has 3,100 employees and around 3 million business and household end users in the country. The E-Distributie companies operate a network of around 128,000 kilometres in three key areas of the country: Muntenia Sud (including Bucharest), Banat and Dobrogea, accounting for one third of Romania’s electricity distribution market, and are developing an investment programme aimed at securing a proper service for customers, improving the quality and security of the network while also complying with Enel’s environmental standards. Enel Energie and Enel Energie Muntenia are leading suppliers of energy in the country, and their offer includes electricity and natural gas, as well as value-added services (assistance, lighting and others).
