ENEL X ROMANIA FINALIZED THE INSTALLATION OF THREE PV PANEL SYSTEMS IN ARAD COUNTY, FOLLOWING AN INVESTMENT OF 560,000 EUROS

Bucharest, October 20th 2020 - Enel X Romania, part of Enel X, the advanced energy services division of the Enel Group, has completed the installation of three photovoltaic panel systems in Sebiş and Arad, following a total investment of over 500,000 euros.

The projects, which will improve the energy efficiency of Gema Superb, Masofma and Gemi Center, involves the placement of 1,500 photovoltaic panels on the roofs of the buildings owned by the three companies, as well as the installation of electrical infrastructure solutions and JuicePole charging stations for electric vehicles.

"Enel X Romania's energy efficiency solutions for companies allow independent power generation, the increase of energy flexibility and profitability, by reducing electricity costs, as well as reducing the impact on the environment, by reducing the carbon footprint. The investments of the three companies from Arad show that more and more Romanian entrepreneurs are interested in clean energy, from renewable sources, both to reduce costs and to become more sustainable", said **Mirel Jarnea**, Head of B2B, Enel X Romania.

"We are ready to make the transition towards a green, sustainable energy, and the solution proposed by Enel X brings us closer to our goal. It is important for us to be able to ensure clean energy throughout the production flow, together with improving the level of energy efficiency", said Cosma Gheorghe, shareholder of Gemi, Gema and Masofma. *"Optimizing energy consumption is very important for a shopping and sports center, and the solution proposed by Enel X is one that suits our needs. At the same time, our customers are open to electric mobility, some of whom are already owners of electric vehicles, so we have also included solutions for charging these vehicles in our plan",* George Ţucudean, shareholder of Gemi, Gema and Masofma, added.

The system installed on the Gema Superb buildings in Sebiş (Arad County) will contribute to the reduction of carbon dioxide emissions by 114.2 tons/ year. The panels located at Gemi Center in Arad will reduce carbon dioxide emissions by 48.6 tons/ year, while the photovoltaic system installed at Masofma (Sebiş locality) will contribute to the reduction of 61.8 tons of carbon dioxide emissions per year. The equipment and technologies used by Enel X in the project have high performance and reliability, coming from major suppliers from the global photovoltaic systems market.

Enel is a multinational power company and a leading integrated player in the global power, gas and renewables markets. It is the largest European utility by ordinary EBITDA, and is present in over 30 countries worldwide, producing energy with over 86 GW of installed capacity. Enel distributes electricity through a network of over 2.2 million kilometers, and with 74 million business and household end users globally, the Group has the largest customer base among its European peers. Enel's renewables arm Enel Green Power is the world's largest renewable private player, with around 46.4 GW of wind, solar, geothermal and hydropower plants installed in Europe, the Americas, Africa, Asia and Oceania.

Enel X is Enel's global business line dedicated to the development of innovative products and digital solutions in sectors where energy is showing the greatest potential for transformation: cities, homes, industries and electric mobility. The company is a global leader in the advanced energy solution sector, managing services such as demand response for more than 6 GW of total capacity at global level and 110 MW of storage capacity installed worldwide, as well as a leading player in the electric mobility sector, with around 130,000 public and private EV charging points made available around the globe. Innovation and sustainability are at the heart of Enel X's strategy since its inception, with circular economy being the perfect combination of these two elements, applied in many of Enel X products and services.

Enel Romania is a leading private investor in energy, with operations in power distribution and supply as well as renewable energy production, active on the local market since 2005. The company has 3,100 employees and around 3 million business and household end users in the country. The E-Distributie companies operate a network of around 128,000 kilometres in three key areas of the country: Muntenia Sud (including Bucharest), Banat and Dobrogea, accounting for one third of Romania's electricity distribution market, and are developing an investment programme aimed at securing a proper service for customers, improving the quality and security of the network while also complying with Enel's environmental standards.
