ENEL X ROMANIA INSTALLS OVER 1,200 PHOTOVOLTAIC PANELS FOR THE MEGA IMAGE RETAILER

Bucharest, January 21th, 2021 - Enel X Romania, part of Enel X, the advanced energy services division of the Enel Group, implements two projects to develop photovoltaic systems for the retailer Mega Image in Popești Leordeni and Sibiu, with an installed capacity of over 500 kWp.

The project in Ilfov County involves the turnkey delivery of a photovoltaic system consisting of over 1,008 photovoltaic panels located on a canopy-type metal structure, specially designed for the parking lot of the Mega Image warehouse, as well as the construction of the related electricity infrastructure. In Sibiu, Enel X Romania will implement a photovoltaic system that involves the installation of 260 photovoltaic panels on the roof of the Mega Image shop.

"We bring our customers energy efficiency solutions that allow companies to generate electricity locally and independently, and to increase energy flexibility and profitability, by reducing electricity costs. Also, the projects developed by Enel X Romania lead to the reduction in the environmental impact, by cutting down the carbon footprint. We are glad that Mega Image has chosen clean energy, from renewable sources, both to reduce costs and due to its sustainability," said **Mirel Jarnea**, Head of B2B Enel X Romania.

The system installed on the roof of the Mega Image warehouse in Popești Leordeni ensures an annual electricity production of over 527 MWh, reducing the carbon dioxide emissions by 246 tons/year. The projects developed together with Enel X bring the Mega Image retailer annual electricity savings estimated at over 65,000 euros.

The project supports the sustainability strategy through which Mega Image is involved and pays special attention to the impact that the activities carried out have on the environment. Stemming from the desire to offer concrete solutions that can help communities benefit from a clean and safe environment, Mega Image uses certified green energy for almost all stores in Bucharest and Ilfov County.

The equipment and technologies used by Enel X in the project have a high performance and reliability and come from well-known suppliers in the global photovoltaic systems market.

Enel is a multinational power company and a leading integrated player in the global power, gas and renewables markets. It is the largest European utility by ordinary EBITDA, and is present in over 30 countries worldwide, producing energy with over 86 GW of installed capacity. Enel distributes electricity through a network of over 2.2 million kilometers, and with around 74 million business and household end users globally, the Group has the largest customer base among its European peers. Enel's renewables arm Enel Green Power is the world's largest renewable private player, with around 46.4 GW of wind, solar, geothermal and hydropower plants installed in Europe, the Americas, Africa, Asia and Oceania.

Enel X is Enel's global business line dedicated to the development of innovative products and digital solutions in sectors where energy is showing the greatest potential for transformation: cities, homes, industries and electric mobility. The company is a global leader in the advanced energy solution sector, managing services such as demand response for over 6 GW of total capacity at global level and 110 MW of storage capacity installed worldwide, as well as a leading player in the electric mobility sector, with around 130,000 public and private EV charging points made available around the globe. Innovation and sustainability are at the heart of Enel X's strategy since its inception, with circular economy being the perfect combination of these two elements, applied in many of Enel X products and services.

Enel Romania is a leading private investor in energy, with operations in power distribution and supply as well as renewable energy production, active on the local market since 2005. The company has 3,100 employees and around 3 million business and household end users in the country. The E-Distributie companies operate a network of around 128,000 kilometres in three key areas of the country: Muntenia Sud (including Bucharest), Banat and Dobrogea, accounting for one third of Romania's electricity distribution market, and are developing an investment programme aimed at securing a proper service for customers, improving the quality and security of the network while also complying with Enel's environmental standards.
